

DCE Electrical

Electrical Installation Specialists

DCE Electrical take pride in offering a service that brings professionalism and focus to our customers Australia wide, providing a total solution to all their electrical installation needs whether it's everyday electrical equipment or highly specialised generation products.

Quality Installations...

DCE Electrical prides itself on being able to deliver a diverse range of electrical and Building Automation Controls and wiring systems.

This is an important part of our operation, as it is well known that all control systems must be installed correctly to achieve correct and reliable performance.

Having our own installation team gives us excellent control over installation practices. We have performed training and have refined our installation methods over the years to give the best results.

Overview of Services

- Design and Engineering of Electrical Installations
- Commercial and Industrial Installation
- Standby and Prime Generator Installation
- Energy Monitoring and Metering
- UPS Installations
- Project Management and Construction Services
- Mechanical Services Electrical Installation

Control Panel Manufacture and CAD...

DCE manufactures their own purpose built switchboard using the Elsteel TECHNO Modular Switchboard System to Australian standards. The TECHNO system has an extremely flexible design, while using a minimal number of parts. The system accommodates fixed, demountable or fully withdrawable modules and can be built to all forms of internal segregation up to Form 4B.

DCE produce quality custom built switchboards for mechanical services, light and power distribution, motor control centres and generation facilities.

Our Designer/Draughtsmen have a wide range of experience in the Electrical, Instrumentation & Control fields and are fully capable of producing the right design to meet the demanding design criteria of today's specifications.

Maintenance Services...

The Maintenance services department is experienced in all types of electrical maintenance.

We specialise in the general maintenance and installation of the following:

- Building refurbishments
- Industrial repairs and installations
- RCD testing
- Emergency and exit light testing
- Replacement of Lamps and tubes
- Repairs to security lights
- Lighting
- Power
- Switchboards
- Power logging and reporting

We carry out programmed maintenance on the following:

- Electrical switchboard inspections

Thermo graphic and power logging surveys and reports
